Education

Jodhpur Institute of Engineering and Technology   *2023 – 2027*
B.Tech in Computer Science - CGPA: 9.7/10

Work Experience

Java Full Stack Developer Intern   *Infosys Springboard*
- Built **EcoBazar**, a sustainability-focused e-commerce platform using **Java** , implementing , role-based access (User/Seller/Admin), and secure user profile management.
- Developed product catalog, carbon analytics modules, enabling eco-friendly product filtering, real-time CO emission tracking, and admin sustainability dashboards.

Full Stack Developer Trainee   *Larsen & Toubro EduTech*
- Built and deployed full stack applications using React.js, Node.js, and MongoDB.
- Implemented RESTful APIs and optimized database queries to improve application performance.

Skills Summary

Technologies: C, Java, DSA, OOPs, MySQL, React.js, Node.js, Express.js, MongoDB, REST APIs , Postman, Git, GitHub, AWS

Soft Skills: Leadership, Collaborative Problem Solving, Technical Communication, Adaptability.

Coding Profile: LeetCode Solved 100+ problems

Achivements

- **Academic Excellence :** Ranked **Top 1%** (9.7 CGPA) among 120+ students.
- Active **ISTE Member** contributing to technical community activities.
- Selected for **AICTE Yukti Innovation Repository** for technical innovation.
- Awarded **Best Trainee Award** at Larsen & Toubro for outstanding performance during industrial training.

Projects

AI-Based Social App   *Link* ↗
- Developed a full-stack real-time social messaging platform with intelligent post classification, enabling dynamic user listing, live online status, and smarter content-based user discovery.
- Tools Used: Python, Hugging Face Transformers, Node.js, MongoDB, Socket.IO

E-Comfy : Household E-Commerce Platform   *Link* ↗
- Developed a web-based platform for buying and selling household products with features for product listings, secure payments, and order tracking.
- Tools Used: React.js, Node.js, Express.js, MongoDB

EcoBazar: Carbon-Aware Shopping Platform   *Link* ↗
- Developed **EcoBazar**, a Java-based e-commerce platform with **role-based authentication, product catalog, smart cart, and carbon footprint analytics** for eco-friendly shopping.
- Tools Used: Java, Spring Boot, JWT, MySQL, REST APIs, Dashboard Visualization

YouTube Browser Extension   *Link* ↗
- Built a Chrome extension (Manifest V3) that uses content scripts, DOM manipulation, and event handling to dynamically modify YouTube pages in real time.
- Tools Used: JavaScript, Chrome Extensions API, Git, VS Code
